

The LPFM expansion may force K-LOVE, a listener-supported service on an FM translator, off of the air. K-LOVE keeps my family informed of the news on a local, national and global level. It keeps my family entertained with music we find uplifting (that cannot be found on other channels in our area). It provides programs that are very meaningful and encouraging to us and to many, many others in our community. It is certainly in the public interest to have such a listener-supported service available. Because of this, we are opposed to the LPFM expansion.
